

Welcome!

Please give us

Your feedback.

Oct/24/23

Awesome exhibit, really fun  
concepts and execution.

- Jesse

absolutely incredible! I wish  
y'all the best! can't wait to  
see more! This was really  
amazing! ☺

- Caroline

Yeah go Mike

---

√ + e ———

absolutely fascinating.  
please never stop creating  
interactive projects

The world of experiment is  
the world of imagination!

There is nothing more gorgeous than  
this world! I am always  
impressed with experimental pieces.

Fabulous!!!

• Bees are beautiful but still fuzzy to see.  
Would love it to be sharper.

Also make explicit instructions.

Flashlight & stand has potential to be bumped & move. too tall for kids/shorter folks - limits audience

But lovely & beautiful. Mechanistic genius! ♡

Hummingbird is hard to see as you all moving it - unless someone does it for you. Can it be mechanized?

Black lines should be more opaque for easier visibility. Flight scene is

STUNNING!

Bird & Egg releases need more explicit instructions - also high for shorter folks/kids. Hard to see all in care with tree & caterpillar while flipping.

The sound is deeply satisfying & a core part of the experience.

- Make the flashlight brighter, its cool but make it bright.

- about the ~~bird~~<sup>city</sup>, lenticular, make the border line thinner rather than thicker. overall the bird in Lenticular is good approach.

Lovely animations! 😊

• Hard to make out the bees → the addition of color & brighter light will help the visual.

→ More center position of each slit

- Tape off areas for Kaleidoscope for proper viewing optimal

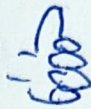

- Flip book - boxes colored → currently standing out from backdrop - overall solid.

- WONDERFUL STITCHING KAT! 😊

- view lenticular piece at an angle

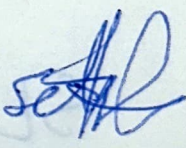

Fantastic craftsmanship on the possum!

All looks great 

- The Humming Bird one should have a Spot designated as the optimum viewing position (maybe a way to move it from 50 far away)

Both the Kaleidoscope & the possum looked awesome! Everything is really impressive.

esto esta muy Bonito - 

Excellent!

- David Budd

Looks awesome!

- Adam Burkemper

AWA, SAM  
My favorite exhibit this year! - CAM

Very Cool and Creative!  
- Delaney

10/25/23

I love interactive exhibitions!

I think possibly including arrows or markers on the floor to guide the exhibition audience through the exhibit may help them to move through ~~the~~ the whole show without any extra help or vocal narrative guide.

SLAYED.

- MARIANA RODRIGUEZ

10/25/23

NEATO!!

NEATO!!

NEATO!!

- Paul  
Karoma

10/25

Hummingbird was the best!

The Bees was amazing!

Good job everyone! 😊

This was all so cool & pretty  
I loved all of it, Y'all stayed!

10/

So cool! loved the moving background.

Ye e haw

- Evan X A

Everything here was vrray unique & cool!  
There's so much creativity & hard work  
done here! It's wonderful!!

10/26

I ~~th~~ liked the out of the  
box thinking! Doing something  
unexpected with animation  
keeps things fresh and interesting!  
keep it up!

-Lillian F.

10/26

A lot of the conversations had to do  
with illusions, especially the lens color  
animation and the kaleidoscopic effect.  
Good job experimental for  
hosting this gallery!  
-Chris Lee

10/26

Sooo... I'm just visiting back as an alumni and a  
Bio major so I have absolutely no critiques (and  
I just think it's so cool and I love that this  
works in progress exhibition is available to see.  
I've never seen the process that goes into  
animation so I loved it! The concepts were  
fun to read about and the interactivity  
were so fun <sup>we</sup> LOVED IT!!! I hope you'll do great  
@ the exhibition, and I especially loved the  
kaleidoscope, apparatus, & moving bee. Loni

10/26

Amazing talent and creativity.  
Love the work & animation here  
Marc Hairston

10/26

Talented students and great content

10/26

Amazing job great work

So great! 🙌😊👏

Art is Hard - great work!  
Amazing. That's all

It was an amazing experience! ❤️

I love your work!

~~Animation~~ Animation is so meticulous  
and wonderful!

R

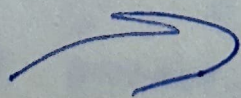

I loved your  
art  
it's  
amazing ♡

insta → iiam. \_ ormon

Your work is really  
creative ♡

To Asha: your art is beautiful,  
but I think the bumblebee  
is hard to see a little!  
It's amazing though!!

To Zarah: your art is also  
beautiful, I bet your mehndi  
art is amazing!! This is  
a minor quibble, could  
you make the boxes lower?  
I'm short. T.T

yay!

To Mickey: I love your

beetle, it's so pretty &  
the Kaleidoscope is an  
awesome touch!! You could  
try low exposure settings to  
help see the cellophane, but  
the piece itself is lovely! Maybe  
you could also make the  
beetle lower in eyeline, I  
didn't see it at first!

To Vicki: Your animation  
is so so cool!! I've only seen  
lenticular animation in art  
history, never in!! Good luck  
with the rest of your animation,  
the scope seems huge. Since  
there is a fray, maybe you  
can raise the glass a bit? Awe some  
work though!

To Katherine: Your stop motion  
is so cute!! It ~~was~~ immediately  
caught my eye! It's beautiful,  
you did amazing sewing and  
handiwork!! It looks beautiful.

Great ~~Exhibit~~ Exhibit!

Loved the interactive element! I loved seeing this project develop from start to finish! great work everyone ♡

- Ana Villareal

I really liked Nick's one.

- Zayan

Awesome! - Jo

Thank ya for your hardwork!

You're all so creative and talented.

- Gavin ♡
