

# Article Review/ COMD 6305

- Choose an article and respond to the questions below.
- Please use your own words.
- You may wish to look up some of the sources mentioned in the article (as background) or search for new, related works.
- If incorporating information from other studies or using any quotes, please identify your sources.
- Be sure to touch on the following:

Authors \_\_\_\_\_

Title of Article \_\_\_\_\_

History of Problem: A brief synopsis including key points

Research Question: What theories are being investigated (if any)? What issues are being investigated and why?  
<- --- THIS IS THE MOST IMPORTANT!!

Research Methodology/Data Analysis

How were the questions quantified? Any strengths or weaknesses here? Please describe in detail. For example, consider invasiveness, accuracy, susceptibility to false measurement (confounds), and ecological validity.

Findings/Results: What were the results? What conclusions were drawn?

Your assessment:

Do you think the conclusions are reasonable, given the data?

Were there any apparent weakness or overstatements?

Did the authors in any way appear to “miss the boat”?

Did you enjoy the article or find it useful?

Can you seem some interesting clinical applications that the researchers might not have realized?

Any thoughts about what a “next experiment” in this area might be?
